Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: A system for enabling a customer to order items from a supplier over the Internet for shipment to a client of the customer comprising:

- shipping means provided on said website for shipping said particular component ... from the supplier to the client including a packing slip with the return address of the customer (e.g., claims 1-11, 13-16, 24, 26-35, 37-40).

• Species B: A method of Internet orders for shipment from a supplier to a client of the customer, comprising:

- shipping an item from a supplier to a client including a packing slip with the return address of the client (e.g., claims 17-21, 41, 43-46).

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 3625

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3625

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Remark:

The examiner did a supplemental search that reveal a concept of a "blind packing slip" sending along an ordered package, (Ogram, US pat. 5,822,737, claims 8-9 obviously teach a subject of: "shipping means provided on said website for shipping said particular component ordered using said ordering means from the supplier to the client including a blink packing slip provided with the return address" (see Ogram, claims 8-9: "8. system according to claim 1 wherein the payment processing computer further includes means for connecting said customer computer, after receipt of said authorization indicia, to a merchant computer at a selected *return address*.

9. The financial transaction system according to claim 8 wherein the payment processing computer further includes:

- a) memory means for storage of said selected *return address*; and,
- b) automated means for retrieving said selected *return address* from said memory means.") of the customer/client (**please note that teaching a selected return address means a choice of optional related address, this meets the claimed limitation**) .

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose number is 703-305-4553. The examiner can normally be reached on 7am-3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's acting supervisor, JEFFREY A. SMITH can be reached on 703-308-3588. The fax phone number for the organization where this application or proceeding is assigned is 703-305-7687.

Art Unit: 3625

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-746-5572.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Please provide support, with page and line numbers, for any amended or new claim in an effort to help advance prosecution; otherwise any new claim language that is introduced in an amended or new claim may be considered as new matter, especially if the Application is a Jumbo Application.
